

Inspections Plus, Inc. Radon Report

Radon Measurement Technician

Inspections Plus, Inc.
Todd Ganz
3951 Sheridan Ave. N.
Minneapolis, MN 55412
612-369-2747

Device Information

Family Safety Products, Inc.
2879 Remico Ave SW, Grandville, MI 49418
Serial #1503 118644
Model No., HS71512
Calibrated; 6-1-15

Radon Test Information

Date of Test: 2015-06-29 @ 6:00 PM to 2015-07-01 @ 7:00 PM

<u>Property Address</u>	<u>Test Number</u>	<u>Analysis Date</u>	<u>Result</u>
5678 158 th St. W. Anytown, MN 55355	002345	2015-07-01	2.4± 0.2 pCi/L

Interpreting your Test Result

The US EPA action level for indoor radon is 4.0 pCi/L. The EPA recommendation for the results in this range (2.0 to 3.9 pCi/L) is to conduct further tests to determine the true annual average, ideally with a long-term test kit. If the result remains between 2 and 4 there is little short term risk, but you should consider fixing your home. Additionally, if you make any structural changes or start to use a lower level of the building more frequently, you should test again.

* No tampering was observed during the radon test.

The subject home described has been tested for the presence of radon gas according to the US EPA short-term testing protocols. The test and the analysis have been performed to comply with the EPA's *Home Buyer's and Seller's Guide to Radon*.

This report represents the average radon concentration at the time of sampling and at the specific location in the building. However, it must be noted that radon concentrations will vary from day to day and from season to season.
